

WELCOME TO OUR OPEN HOUSE!

**Rand Road/IL 83/Kensington Road
Phase I Engineering Study
Monday December 3, 2018
6:00 – 8:00 pm
Village Hall Community Room,
50 S Emerson St, Mount Prospect**

The Village of Mount Prospect welcomes you to the Open House Public Meeting for the Phase I Engineering Study for the roadways at and around the intersection of Rand Road (US Route 12), Elmhurst Road (IL 83), and Kensington Road in the Village of Mount Prospect.

We encourage you to walk around and learn more about the study, chat with Village staff, and provide us your input on the issues important to you. Your feedback is valuable in improving the area for everyone.

BACKGROUND

The intersection of these three roads actually constitute three separate but closely spaced intersections within a commercial and residential area just to the southwest of Randhurst Village. The purpose of this study is to evaluate the Rand Road/IL 83/Kensington Road intersection and to understand how the intersection can better serve the community.

As part of the Mount Prospect Strategic Plan to address transportation issues, the study is evaluating improvements to benefit motorists, pedestrians, bicyclists, businesses, and residents. The study involves roadways under the jurisdiction of the Illinois Department of Transportation (IDOT), so coordination with IDOT is a part of this study process. A Rand Road Corridor Study was completed in 2017 and forms the basis of improvements being considered as part of this current study. Other aspects of the study include access management along the roadways, potential property access connections, safety studies at nearby intersections, and pedestrian/bicycle infrastructure enhancements.

PHASE I *we are here ENGINEERING STUDY

- Review existing conditions
- Identify alternatives
- Involve the community
- Select the preferred plan
- (2018-2019)

PHASE II CONTRACT PLAN PREPARATION

- Prepare construction documents
- Acquire land if needed
- Secure permits
- Issue plans for bidding
- (2020-2021, dependent upon funding)

PHASE III CONSTRUCTION

- Construct improvements at once, or in phases
- (Earliest start 2022, dependent upon funding)
